EDUCATIONAL TOUR

Event Organized by

Department of Political Science

Bilasipara College

Date: 27/01/24

Time: 7am

Venue: Manas National Park

Beneficiaries: 6th, 4th & 2nd Semester students of the Department of Political Science, Bilasipara College.

Introduction:

Manas National Park, located in the northeastern part of India in the state of Assam, is one of the most renowned protected areas in the world, known for its rich biodiversity and being a UNESCO World Heritage Site. The park lies at the foothills of the Eastern Himalayas and covers an area of approximately 1,000 square kilometers, including both grasslands and tropical forests. This educational tour was organized to expose students to the significance of wildlife

conservation, understand the unique ecosystem of the park, and explore the variety of flora and fauna it supports.

Objectives:

- To enhance students' knowledge of biodiversity and conservation efforts.
- To understand the role of national parks in preserving endangered species.
- To observe the ecological balance within a protected wildlife area.
- To learn about the community involvement in the preservation of Manas National Park.

Schedule of the day:

1. Arrival and Introduction to Manas.
2. Setting up of the tent and other required arrangement.
3. Boat ride of the students accompanied by the faculty members.
4. Jeep Safari inside Manas National Park.
5. Interaction with the local community nearby.
6. Lunch
7. Recreational activities

Educational Tour at Manas National Park, organized by the Department of Political Science.

With the aforesaid objectives in mind the trip started around 7am from the premises of Bilasipara College. Students from all the three semesters of the department participated and were accompanied by the three faculty members of the department. The bus reached the destination at around 10am. After arrival, arrangements were made for tents and other related materials, afterwhich the students were given a brief about the National Park and surroundings by the faculty members of the Department.

After a brief interval of refreshments, the students along with the faculty members headed for the boat ride, followed by an adventurous jeep safari inside the park. During this safari the students became well acquainted with the biodiversity that Manas National Park holds.

After this extremely empirical experience the students were given an opportunity to interact with the local community nearby, understanding their indigenous way of living a balanced and sustainable life with nature, the problems that they face and their opinion regarding preserving of biodiversity and the role played by the Manas National Park in the same.

Lastly, the trip ended on a sweet note with some recreational activities between the teachers and students thereby creating a positive environment within the department.
