

## REPORT ON FIELD TRIP

Submitted by the Honours students of B.sc 6th semester, Department of Zoology, Bilasipara college

on.

**" Fish culture Heritage of Assam: Group fishing and Fishes of Kachua Beed of Bilasipara subdivision : A case study"**

Dated : 11.02.2024

Place : Kachua beel, 15km away from Bilasipara town.

Field trip organized by the Department of Zoology in collaboration with IQAC Bilasipara College.

Through this field trip we gain the traditional knowledge (TK) possessed by different communities of local people (like nNath, Jugi, Muslim etc) are often closely linked to their way, of life. The present study tried to document the traditional knowledge of Nath and Muslim communities in Bilasipara subdivision of Dhubri Distict of Assam, especially with reference to fisheries through the participatory Rural Appraisal Method. Result showed that women are a prominent presence in the fishery related activities in Bilasipara Subdivision. The carry out fishing using traditional, simple and easy to manoeuvre gear. Women are also active in processing fish to meet household need as well as for sale of dried and processed Fish in the local village marketing is almost entirely dominated by Women. Group fishing practice is also a unique culture heritage of beels of these localities where women also participate along with men.

Picture :- Group Fishing of different types of local fishes by villagers.
